Optimize your sunbed management and your guests' experience

Because managing sunbeds is often impossible without dedicated staff,
LOCKSUN automates the process and enhances your outdoor spaces.

LOCKSUN automates and enhances a new guest experience

At check-in, or any time during their stay, the guest receives a **programmed RFID wristband** for the chosen duration – by the hour, by the day, or for the entire stay.

By scanning the wristband on the box fixed to the sunbed, the system **verifies authorization and automatically switches to "occupied" mode.**

This visual indicator allows staff to instantly identify which sunbeds are legitimately in use.

At the end of the period, the sunbed automatically resets to "available" – no staff action required.

100% autonomous, the system requires **no wiring, no network, and no maintenance**, and operates for multiple seasons on a single battery.

Why equip your establishment with LOCKSUN?

- **Optimize** the management and rotation of your sunbeds
- **Enhance** your premium zones with zero management effort
- **Choose** to monetize the service, offer it to your best guests, or combine both
- **Reduce** staff workload and disputes
- **Benefit** from a 100% autonomous system, with no wiring or maintenance
- **Recoup** your investment in just a few days
- **Stand out** with a simple and innovative solution

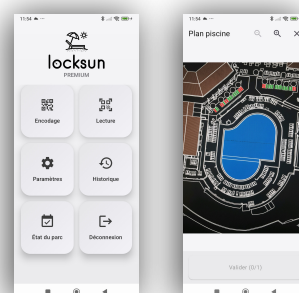

- LOCKSUN wristbands can be replaced with your existing models (door access, payments, etc.).
- Alternatively, we can customize them with your establishment's colors and logo.

- Install the device in under 30 seconds thanks to its patented system.
- Operates for multiple seasons without recharging or replacing batteries.

- Intuitive app designed for front-desk staff.
- Fast wristband encoding, activation tracking, and real-time park monitoring.

With **LOCKSUN**, enhance your sunbed areas
and offer your guests **peace of mind made simple.**
